RESEARCH

Contents Volume 101

Case Study

1 A state space condition monitoring model for furnace erosion prediction and replacement
A.H. Christer, W. Wang and J.M. Sharp

Theory and Methodology

15 Sensitivity analysis in linear programming: just be careful!
B. Jansen, J.J. de Jong, C. Roos and T. Terlaky
29 The balanced linear programming problem
R.K. Ahuja
39 Rank-based statistical procedures in Analytic Hierarchy Process
I. Basak
51 Equivalences between Data Envelopment Analysis and the theory of redundancy in linear systems
J.H. Dulá
65 Response surface methodology: A neural network approach
M.F. Anjum, I. Tasadduq and K. Al-Sultan
74 Greedy sets and related problems
E. Girlich, M.M. Kovalev and D.M. Vasilkov
81 Computational experience with approximation algorithms for the set covering problem
T. Grossman and A. Wool
93 A branch-and-bound algorithm for the mini-max spanning forest problem
T. Yamada, H. Takahashi and S. Kataoka
104 An enumerative algorithm framework for a class of nonlinear integer programming problems
M. Djerdjour
122 Second order symmetric duality for nonlinear minimax mixed integer programs
T.R. Gulati and I. Ahmad
130 A contraction algorithm for the multiparametric integer linear programming problem
A. Crema
140 A simple SLP algorithm for solving a class of nonlinear programs
R.A. Sarker and E.A. Gunn
155 A new penalty function algorithm for convex quadratic programming
M. Ben-Daya and K.S. Al-Sultan
164 The most-obtuse-angle row pivot rule for achieving dual feasibility: A computational study
P.-Q. Pan
177 Stochastic linear programs with restricted recourse
H. Vladimirou and S.A. Zenios
193 Modelling stochastic decision systems using dependent-chance programming
B. Liu and K. Iwamura
204 Decomposition of the fuzzy parametric space in multiobjective nonlinear programming problems
M.A.E.-H. Kassem

Short Communication

220 A note on a global approach for general 0–1 fractional programming
T.-H. Wu

Sections

224 OR Software – ORSEP: Operations Research Software Exchange Program, *Professor H.W. Hamacher (ed.)*
GP – A C language implementation of genetic programming
M.A. Pollatschek
226 Book Reviews
H. Fleuren (ed.)

Feature Issue: Thirteenth EURO Summer Institute: Stochastic Optimization

Editorial

229 Thirteenth EURO Summer Institute: Stochastic Optimization
G.Ch. Pflug and A. Ruszczyński

Theory

230 On nonsmooth and discontinuous problems of stochastic systems optimization
Y.M. Ermoliev and V.I. Norkin
245 Optimal allocation of simulation experiments in discrete stochastic optimization and approximative algorithms
A. Futschik and G.Ch. Pflug
261 Stochastic gradient algorithm with random truncations
V. Tadić
285 Estimated stochastic programs with chance constraints
N. Gröwe

Algorithms and Implementations

306 A cutting-plane approach to mixed 0–1 stochastic integer programs
C.C. Carøe and J. Tind
317 The augmented system variant of IPMs in two-stage stochastic linear programming computation
C. Mészáros
328 Accelerating the regularized decomposition method for two stage stochastic linear problems
A. Ruszczyński and A. Świętanowski
343 Modelling and analysis of multistage stochastic programming problems: A software environment
E. Messina and G. Mitra

Models

360 Stochastic optimization on Bayesian nets
F. Archetti, A. Gaivoronski and F. Stella
374 Discretized reality and spurious profits in stochastic programming models for asset/liability management
P. Klaassen
393 Fast simulation of blocking probabilities in loss networks
M. Mandjes
406 An applied study on recursive estimation methods, neural networks and forecasting
J.C. Teixeira and A.J. Rodrigues

Invited Review

419 Supply chain partnerships: Opportunities for operations research
M.J. Maloni and W.C. Benton

Theory and Methodology

430 Spatial organization of an industrial area: Distribution of the environmental cost and equity policies
J. Karkazis and B. Boffey
442 Multicriteria decision analysis in a decision tree
F.A. Lootsma
452 A framework for decision support systems for scheduling problems
K. Ecker, J.N.D. Gupta and G. Schmidt
463 The teacher assignment problem: A special case of the fixed charge transportation problem
T.H. Hultberg and D.M. Cardoso
474 Lead time and response time in a pull production control system
I. Kim and C.S. Tang
486 Robust autoregressive estimates using quadratic programming
G. Zioutas, L. Camarinopoulos and E. Bora Senta
499 A dynamic programming heuristic for the *P*-median problem
M. Hribar and M.S. Daskin
509 Direct shipping and the dynamic single-depot/multi-retailer inventory system
D. Barnes-Schuster and Y. Bassok
519 A multi-product loading problem: a model and solution method
U. Yuceer
532 Supply rationing in multi-echelon divergent systems
M.C. van der Heijden
550 Setting the length of the planning horizon in the vehicle replacement problem
J.F. de Sousa and R.C. Guimarães
560 Variance of the throughput of an *N*-station production line with no intermediate buffers and time dependent failures
B. Tan
577 Using an interior point method for the master problem in a decomposition approach
J. Gondzio, R. Sarkissian and J.-P. Vial
588 Rendezvous search on the line with bounded resources: expected time minimization
S. Alpern and A. Beck
598 Facets for node packing
A.T. Murray and R.L. Church

Sections

609 Book Review
H. Fleuren (ed.)
